

DELAWARE STATE-WIDE INFORMATION TECHNOLOGY AND ARCHITECTURE STANDARDS

Standard ID:	PL-PCOS-001
Title:	Client Operating Systems
Domain:	Platform
Discipline:	Software
Date Updated:	07/14/2017
Revision no.:	9
Original date:	07/07/2004

I. Authority, Applicability and Purpose

- A. Authority:** [Title 29](#) Chapter 90C Delaware Code, §9004C – General Powers, duties and functions of DTI “2) Create, implement and enforce statewide and agency technology solutions, policies, standards and guidelines, including as recommended by the Technology Investment Council on an ongoing basis and the CIO”
- B. Applicability:** Applies to all State of Delaware communications and computing resources. DTI is an Executive Branch Agency and has no authority over the customers in Legislative and Judicial Branches, as well as School Districts, and other Federal and Local Government entities that use these resources. However, all users, including these entities, must agree to abide by all policies, standards promulgated by DTI as a condition of funding, access, and continued use of these resources.
- C. Purpose:** The end-user client platform is the largest segment in the IT market, and the maintenance, repair and safeguarding of client machines is the highest cost of that segment. This standard will address the operating system(s) of this huge investment in an attempt to reduce unnecessary costs.

II. Scope

- A. Audience:** This document is intended for Systems Administrators, Network Administrators, Computer Auditors, and PC Support personnel. This document is not intended for use by non-IT personnel.
- B. Machines:** This standard will cover all desktops, notebooks (laptops), media centers and tablet PCs owned and operated by the State. It will cover all PCs and notebooks, tablets and media centers owned and operated by contractors who connect behind our firewall. This standard does not cover non-State-owned home PCs or non-State-owned PCs connected through the Internet.
- C. Areas Covered:** Only operating systems are covered by this standard, not browsers or utilities.

These standards are adopted by the Department of Technology and Information (DTI), through the Technology and Architecture Standards Committee (TASC), and are applicable to all Information Technology use throughout the State of Delaware. Any questions or comments should be directed to dji_tasc@state.de.us.

DELAWARE STATE-WIDE INFORMATION TECHNOLOGY AND ARCHITECTURE STANDARDS

- D. **Environments:** Desktops, notebooks (laptops), media centers, smart phones and tablets are covered by this standard.

III. Process

- A. **Adoption:** These standards have been adopted by the Department of Technology and Information (DTI) through the Technology and Architecture Standards Committee (TASC) and are applicable to all Information Technology use throughout the State of Delaware.
- B. **Revision:** Technology is constantly evolving; therefore, the standards will need to be regularly reviewed. It is the intent of TASC to review each standard annually. TASC is open to suggestions and comments from knowledgeable individuals within the State, although we ask that they be channeled through your Information Resource Manager (IRM).
- C. **Contractors:** Contractors or other third parties are required to comply with these standards when proposing technology solutions to DTI or other State entities. Failure to do so could result in rejection by the Delaware Technology Investment Council. For further guidance, or to seek review of a component that is not rated below, contact the TASC at dti_tasc@state.de.us.
- D. **Implementation responsibility:** DTI and/or the organization's technical staff will implement this standard during the course of normal business activities, including business case review, architectural review, project execution and the design, development, or support of systems.
- E. **Enforcement:** DTI will enforce this standard during the course of normal business activities, including business case and architectural review of proposed projects and during the design, development, or support of systems. This standard may also be enforced by others during the course of their normal business activities, including audits and design reviews.
- F. **Contact us:** Any questions or comments should be directed to dti_tasc@state.de.us.

IV. Definitions/Declarations

A. Definitions

1. **Desktop** - Any computing device engineered to remain stationary that contains a hard drive, memory, and CPU (the monitor and keyboard are usually separate pieces from the PC case) and expansion slots. The intent of the device is to be used by one person at a time, or perhaps one person and a print service.
2. **Notebook (laptop)** - Any computer engineered for portability that contains a hard drive, memory, and CPU (the monitor and keyboard are usually connected to the PC case) and usually does not have expansion slots. The intent of the device is to be used by one person at a time.
3. **Tablet** - It is a mobile computing device often with a touch screen and a form factor larger than a 'smart phone'
4. **Media Center** - Generally designed for sound and video manipulation. Its primary intent is not business data. This machine is usually designed for multimedia (for example Microsoft® Windows® XP Media Center Edition). An example of a Media Center is an HP Media Center.

These standards are adopted by the Department of Technology and Information (DTI), through the Technology and Architecture Standards Committee (TASC), and are applicable to all Information Technology use throughout the State of Delaware. Any questions or comments should be directed to dti_tasc@state.de.us.

DELAWARE STATE-WIDE INFORMATION TECHNOLOGY AND ARCHITECTURE STANDARDS

5. **Operating System** - Software that coordinates various activities of the computer (e.g., memory management, and shared libraries) and mediates between application software and computer hardware (print services, for example). Two examples of Operating Systems are Microsoft's Windows XP and SuSE Linux.
6. **Browser** - A program with a graphical user interface for displaying HTML files used to navigate the World Wide Web. For example, Internet Explorer or Firefox.
7. **Utility** - A program to carry out a routine function; For example, virus checkers like MacAfee.
8. **Server** - A hardware device on a network that manages resources such as printers, files and applications. The intent of this hardware device is to provide benefit to more than one person at a time.
9. **Embedded** - An embedded system is some combination of computer hardware and software, either fixed in capability or programmable, that is specifically designed for a particular kind of application device. Industrial machines, automobiles, medical equipment, cameras, household appliances, airplanes, vending machines, and toys are among the possible hosts of an embedded system. Embedded systems that are programmable are provided with a programming interface, and embedded systems programming is a specialized occupation.
10. **Mobile Device** - A type of short-wave analog or digital telecommunication device in which a subscriber has a wireless connection from a mobile phone or PDA or phone with PDA to a relatively nearby transmitter. The transmitter's span of coverage is called a cell. They usually have an embedded operating system (as opposed to a portable telephone). An example of a mobile device would be an iPhone.
11. **Terminal Services** - Operating a remote computer as though you were sitting in front of it.

B. Declarations

A client operating system:

1. Must adhere to the State's [Software Policy](#).

DELAWARE STATE-WIDE INFORMATION TECHNOLOGY AND ARCHITECTURE STANDARDS

V. Definitions of Ratings

Individual components within a Standard will be rated in one of the following categories.

COMPONENT RATING	USAGE NOTES
<p>STANDARD – DTI offers internal support and/or has arranged for external vendor support as well (where applicable). DTI believes the component is robust and solidly positioned in its product life cycle.</p>	<p>These components can be used without explicit DTI approval for both new projects and enhancement of existing systems.</p>
<p>DECLINING – Deprecated - DTI considers the component to be a likely candidate to have support discontinued in the near future. A deprecated element is one becoming invalid or obsolete.</p>	<p>Via the State’s waiver process, these components must be explicitly approved by DTI for all projects. They must not be used for minor enhancement and system maintenance without explicit DTI approval via the State’s waiver process.</p>
<p>DISALLOWED – DTI declares the component to be unacceptable for use and will actively intervene to disallow its use when discovered.</p>	<p>No waiver requests for new solutions with this component rating will be considered.</p>

- A. Missing Components** – No conclusions should be inferred if a specific component is not listed. Instead, contact the TASC to obtain further information.

DELAWARE STATE-WIDE INFORMATION TECHNOLOGY AND ARCHITECTURE STANDARDS

VI. Component Assessments

- A. The State of Delaware Policy and Standards pages:
<http://dti.delaware.gov/information/standards-policies.shtml> must be consulted when setting up a PC with a new operating system and periodically thereafter to provide security and safety to the State's resources. Note: Microsoft's web site for operating system life cycles is:
<http://support.microsoft.com/default.aspx?scid=fh%3Ben-us%3Blifecycle&LN=EN-US&x=3&y=16>

Component	Rating	Comments
<u>Windows OS</u>		
Windows 10 Professional Enterprise	Standard	
Windows 7 SP1 Professional Enterprise Ultimate	Standard	Provided that backward-compatibility issues are resolved.
Windows 8.1	Standard	
Windows 8	Declining	
Windows XP Professional SP3	Disallowed	Provided that security measures are followed. Mainstream support expired in April 2009. Extended support will expire in April 2014. However, XP's ability to support applications will decrease, because of the 4GB RAM limit. 64 bit XP does not have this limitation.
Windows XP Tablet	Disallowed	For Tablet PCs – Extended support will expire in April 2014
Windows VISTA SP2 Business Enterprise Ultimate	Declining	Extended support ends April 2017.
Windows Media Center SP3	Disallowed	Must be standalone. Cannot be placed in the State's Domain. Extended support will expire in April 2014
Windows CE .NET 4.2	Disallowed	Mainstream Support has ended. Extended support expires on 7/9/2013.

These standards are adopted by the Department of Technology and Information (DTI), through the Technology and Architecture Standards Committee (TASC), and are applicable to all Information Technology use throughout the State of Delaware. Any questions or comments should be directed to dti_tasc@state.de.us.

DELAWARE STATE-WIDE INFORMATION TECHNOLOGY AND ARCHITECTURE STANDARDS

Thin Client (Windows)	Declining	This includes MSFT's .NET CE and XP Embedded when used in a Terminal Services mode.
Windows 2000	Disallowed	
Component	Rating	Comments
Windows XP Home	Disallowed	
Windows VISTA Basic Premium	Disallowed	
Windows XP Professional	Disallowed	SP 1 and SP 2 and below
Windows NT	Disallowed	
Windows ME	Disallowed	
Windows 3.x	Disallowed	
DOS (including DR DOS)	Disallowed	
Windows 95	Disallowed	Essential Windows 2003 Server Security settings cannot be implemented if a Win 9x platform is connected to the core. No instance of Win 9x will be connected to the core. This excludes K-12 machines that are not connected to the State core.
Windows 98 & Windows 98 2 nd Edition	Disallowed	Essential Windows 2003 Server Security settings cannot be implemented if a Win 9x platform is connected to the core. No instance of Win 9x will be connected to the core. This excludes K-12 machines that are not connected to the State core.
<u>MAC</u>		
MAC OS X	Standard	10.10.x and 10.11.x
MAC OS X	Declining	Version 10.8.x and 10.9.x
MAC OS	Disallowed	Version 10.7.x and below
<u>Android</u>		
Ice Cream Sandwich	Declining	Version 4.0.3 – 4.0.4
Honeycomb	Declining	Version 3.x.x
Gingerbread	Declining	Version 2.3.3 – Version 2.3.7
Jelly Bean	Standard	Version 4.1.x, Version 4.2.x, Version 4.3.x

These standards are adopted by the Department of Technology and Information (DTI), through the Technology and Architecture Standards Committee (TASC), and are applicable to all Information Technology use throughout the State of Delaware. Any questions or comments should be directed to dti_tasc@state.de.us.

DELAWARE STATE-WIDE INFORMATION TECHNOLOGY AND ARCHITECTURE STANDARDS

KitKat	Standard	Version 4.4
Lollipop	Standard	Version 5.x
Component	Rating	Comments
Froyo	Declining	Version 2.2
Éclair	Declining	Version 2.0 and 2.1
<u>MAC iOS</u>		
IOS	Standard	Version 10.x
IOS	Declining	Version 9.x
iOS	Declining	Version 8.x
iOS	Disallow	Version 7.x and below

These standards are adopted by the Department of Technology and Information (DTI), through the Technology and Architecture Standards Committee (TASC), and are applicable to all Information Technology use throughout the State of Delaware. Any questions or comments should be directed to dti_tasc@state.de.us.
